Apply as a Web Developer

Dear Reader,

i am very grateful for the opportunity to introduce myself to you. My name is Heorhii Honcharov, I am Ukrainian and I am a developer with experience in fullstack web application development. My technology stack: HTML, CSS/SCSS, Javascript/Typescript, React, Redux/RTK, Node.js/Express.js, MongoDB, Firebase. Programming is one of my favorite things to do. I enjoy solving tasks and optimizing the code so that it looks clear and beautiful and works efficiently.

I am ready to offer my services and experience in developing web applications in HTML, CSS/SCSS and JavaScript as well as Single Page Applications (SPA) in React and Redux. This combination allows me to implement complex user interactions and efficient data flows in web applications. And with Node.js and Express.js, I can develop server-side applications for serving external data and user authorization. My knowledge of these technologies allows me to create robust APIs and easily integrate them into existing systems.

You can see my projects on my portfolio page: <https://demiggy.github.io/webdeveloper-honcharov/> or my code in the GitHub repository at: <https://github.com/DemiGGV>

What attracts me to _____ as an employer is the opportunity to work in a dynamic environment where I can develop my skills and learn from experienced colleagues while developing my technical and soft skills.

I look forward to convincing you of my abilities in a personal interview and learning more about the exciting projects at _____. I would be happy to offer you a taster day or a fortnight's internship to convince you of my commitment and working methods. I will also make my information available to you for future hiring decisions.

With best regards,

/Heorhii Honcharov/
